Education

BS -Computer Science from Punjab University

2011 - 2015

CGPA: 3.31

Projects

Title: [Fonhealth](#)

Description: It is a web application for nodule and lung screening patient management with lcsr data submission and analytics. I worked on several features in this application i.e. data maps, large dynamic reactive forms, analytics queries using postgres, notifications systems, alerts, data exports, data grids, analytics/charts, Elastic Search on physician's database and on several backend data processing/transformation APIs and scripts to receive and manage patient's information from H17 parsers.

Tools & Technologies: Node JS, Angular, Postgres, RDS, Highcharts, Rest APIs

Title: [Audiocardio](#)

Description: AudioCardio™ is a data and science backed sound therapy designed to protect and strengthen your hearing. I worked on the payments module, admin dashboard and the fully customizable subscription and coupons based payments module.

Tools & Technologies: React JS, Redux, Observables, React Hooks, Stripe JS, Firebase

Title: [Scheduler](#)

Description: Chat and scheduler application to schedule the appointment with doctors and real time dicom sharing and chatting

Tools & Technologies: Node JS, Angular, Socket.io, Dicom, files, AWS, Video calling using tokbox

Title: [Photele](#)

Description: Book a photographer to capture your memories with your friends or family. I worked on photographer panel, backend api's development and mobile application development in this project.

Tools & Technologies: Node JS, IONIC, Angular, Heroku, S3 Bucket, MongoDB

Title: [Photele](#)

Description: Book a photographer to capture your memories with your friends or family. I worked on photographer panel, backend api's development and mobile application development in this project.

Tools & Technologies: Node JS, IONIC, Angular, Heroku, S3 Bucket, MongoDB, Swagger Docs

Title: [api.d-vour.com](#)

Description: I developed rest api for https://d-vour.com for end to end food delivery solution for home and professional chefs

Tools & Technologies: Node JS, MongoDB, Swagger, AWS EC2, NGINX
